Gail Nolan CEcD - CEO

PR5G Zone + Blockchain Ignition Lab

RE: Letter of Commitment

The National Puerto Rican Chamber of Commerce (NPRCC) has reviewed the EDA Tech Hub guidelines and specifically the application being submitted by you, The Puerto Rico 5G Zone Inc, on behalf of the Research, Enabled Advanced Communication Hub (REACH) Consortium. We have been actively engaged with you in this consortium and are committed to being a supportive collaborator on this application. Our engagement will be to actively continue participating in consortium strategy development activities related to this initiative.

The National Puerto Rican Chamber of Commerce (NPRCC) is a non-profit organization created to support the development of entrepreneurship, innovation, and business expansion throughout Puerto Rico and the U.S. Mainland by providing a comprehensive resource for incubating business ideas, leveraging new markets, taking advantage of new opportunities, and advocating for policies that help our communities grow. We are the bridge between Puerto Rico and the U.S. and actively connect the Puerto Rican diaspora and those local to the island. We recognize the value this proposal would provide regarding our current or future operations in Puerto Rico.

With our expertise in economic development with a focus on rural broadband, agritech and providing digital equity to all Puerto Ricans we offer the Consortium the capabilities and skills to support efforts to advance the programs' ability to commercialize, deploy, and domestically manufacture and deliver new technologies and applications while supporting the engagement of underserved populations in vibrant technology-led economic ecosystems.

Sincerely,

Joel Berrocal

Joel Berrocal - Executive Director

The National Puerto Rican Chamber of Commerce
